

Nominate Equestrian app – Horse health declaration

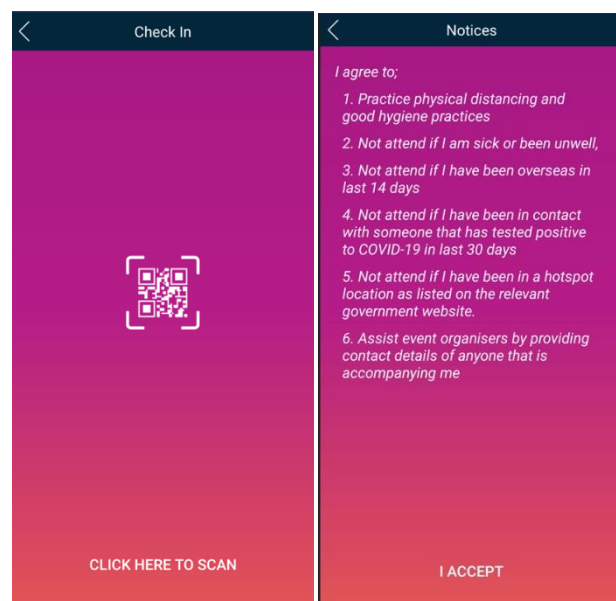

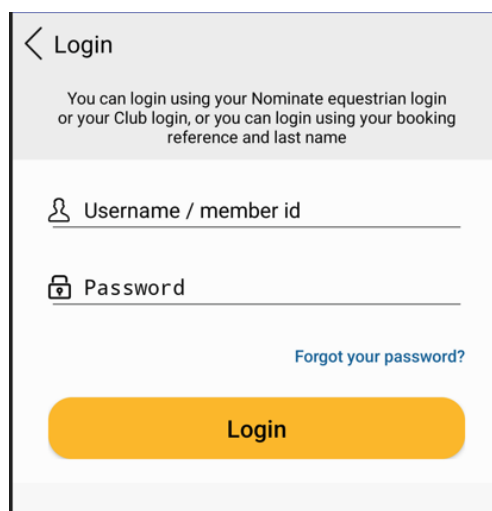

For Riders and associates

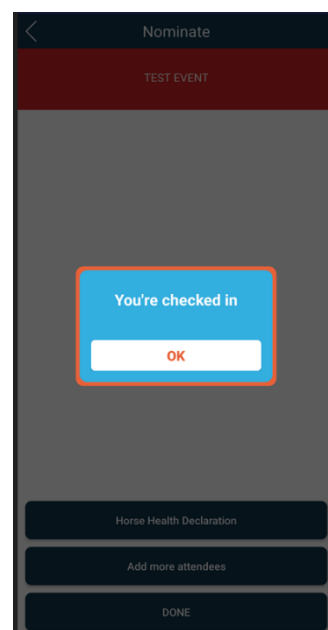

Download the Nominate Equestrian app and select “Check In” when you arrive.

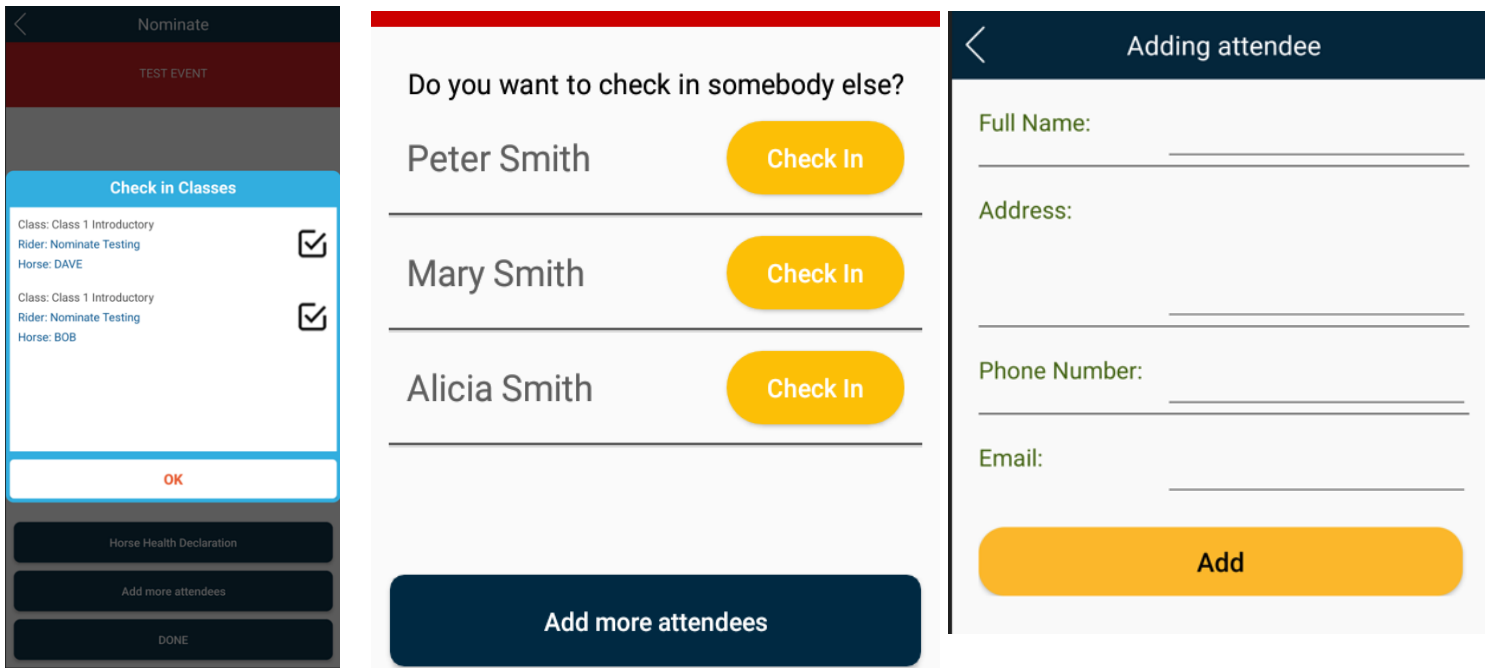

You will be asked to log in and you can do this with your rider login username and password. If you don't have a rider login, you can use your booking reference (found on your email receipt) and your booking last name.

When you have logged in you will get a screen allowing you to scan the QR code that your club has displayed for its event. You will be asked to complete a declaration and once accepted, you are checked in.

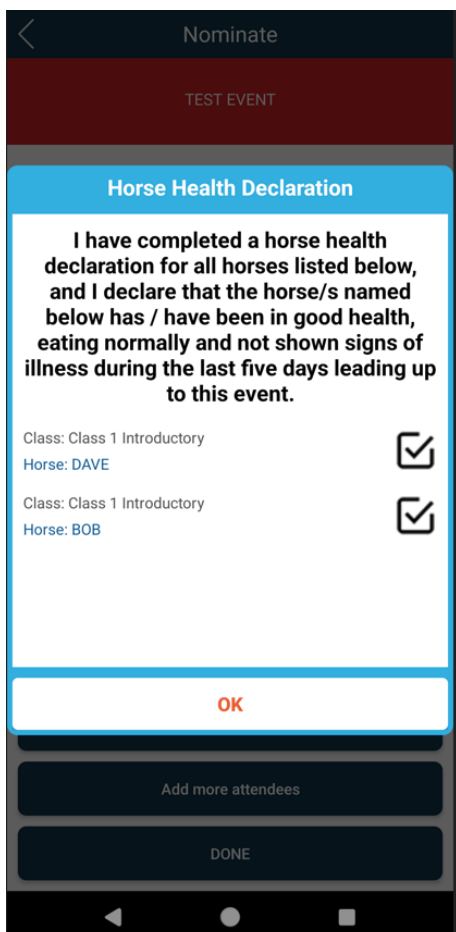

After you have checked yourself in, the app will prompt you to check in for the specific classes entered.

The app will also display any additional riders linked to your rider login, and you will have the ability to check them in also.

If you are checking in somebody that isn't listed in your login, you can do this manually by selecting "Add more attendees" and entering their details (name, address, phone number, email address) manually.

Once you have done this, both you and the people with you are checked in to your club or event and your details will be recorded.

If your event has a horse health declaration form, you will also be required to complete the final declaration during the check in process. Horses will be ticked by default and you just need to tick ok to finalise your declaration.
